steel brackets and
connectors for strength,
stabilityand long-term
durability.

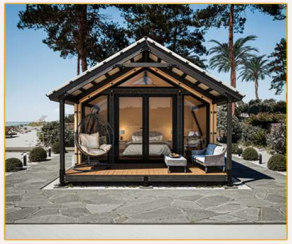

BASE FRAME

Structural base frame providing a strong and stable foundation for the tent and supporting the raised wood floor system.

WOOD FLOOR SYSTEM

Raised timber floor structure providing a solid, durable, stable and insulated base with rodent mesh for the tent

ALUMINUM FRAME GLASS WALL & DOORS

Full-height aluminum framed glass wall with doors, creating a bright interior and a seamless connection to the covered terrace.

THERMAL INSULATION

Rock wool insulation integrated into the roof and wall system for improved thermal comfort and reliable year-round use.

ALL-SEASON BENEFITS

Enhanced insulation for greater comfort privacy and a better glamping experience.

THERMAL COMFORT
Improved comfort and more stable interior conditions during colder weather.

MORE PRIVACY
Reduced light transmission through the fabric for a more private interior environment.

ACOUSTIC COMFORT
Rock wool insulation helps reduce sound transmission for a quieter interior space.
